

Colour & Typography Specification

Hex values, functional roles, contrast rules and type scale for
implementing the Baeroh website. Version 1.0 — for development use.

01 COLOUR TOKENS

Seven core colours. Use exact hex values — do not substitute similar shades.

	NAME	HEX	ROLE	USAGE
	Ivory	#F3F0EA	Background	Dominant page background — most surfaces.
	Sand	#D2C4B2	Surface	Secondary section backgrounds, dividers.
	Taupe	#B8AA9D	Surface	Backgrounds only. Do not use as text on light backgrounds.
	Charcoal	#3E312B	Text / Dark BG	Primary text colour. Also used as dark section background.
	Olive	#6B6857	Text	Secondary text / captions on light backgrounds only.
	Cinnamon	#9B6A4E	Accent	Headlines, underlines, hover states. Large text only — see rules.
	Sandstone	#8D806F	Rare Accent	One quiet detail per page — hairline, caption, hover state. Use sparingly.

FUNCTIONAL VARIANTS

	NAME	HEX	WHEN TO USE
	Cinnamon — Tint	#C49F8A	Use in place of Cinnamon whenever cinnamon-coloured text sits on a dark (Charcoal) background.
	Cinnamon — Deep	#906348	Use in place of Cinnamon whenever cinnamon-coloured text is small (labels, captions, under ~14px) on a light background.

Rationale: Cinnamon at full value fails WCAG AA contrast at small sizes and on dark backgrounds. The two variants above exist specifically to avoid that — see Contrast Rules, next page.

02 CONTRAST RULES (WCAG AA)

Verified contrast ratios. Please follow the rule column exactly — several combinations below fail accessibility standards and should not be used as written, even if they appear in a design mockup.

COLOUR	AGAINST	RATIO	RESULT	RULE
Charcoal	Ivory	11.0 : 1	AA Pass	Body text, either direction.
Olive	Ivory	4.9 : 1	AA Pass	Captions, secondary copy on light backgrounds.
Taupe	Charcoal	5.5 : 1	AA Pass	Text on dark sections only — not on light.
Cinnamon	Ivory	4.0 : 1	Large text only	Large text / headlines only (≥18px). Never body copy.
Sandstone	either	~3.3 : 1	Large text only	Large display type or decorative use only.
Cinnamon	Charcoal	2.7 : 1	Fails — do not use	Do not use. Use Cinnamon Tint (#C49F8A) instead.
Olive	Charcoal	2.2 : 1	Fails — do not use	Do not use as text on dark backgrounds.
Taupe	Ivory	2.0 : 1	Fails — do not use	Do not use as text on light backgrounds — background/divider use only.

"Large text" = 18px+ regular weight, or 14px+ bold, per WCAG 2.1 guidelines.

Display / headline typeface: Cormorant Garamond — weights used: Light, Regular, Medium, SemiBold, Italic.

Body / UI typeface: Montserrat — weights used: Light (300), Regular (400), SemiBold (600).

Both are available as free, open-source Google Fonts (variable font files).

ROLE	TYPEFACE	WEIGHT	SIZE	LINE-HEIGHT
Hero / Display	Cormorant Garamond	Light (300)	44–84px	1.05–1.15
Section Heading	Cormorant Garamond	Regular (400)	28–46px	1.2–1.3
Lead / Intro	Cormorant Garamond	Light (300)	16–22px	1.45–1.55
Body Copy	Montserrat	Light (300)	14–16px	1.7
Caption / Label	Montserrat	SemiBold (600)	8–11px	1.3, uppercase, letter-spacing 0.18–0.32em
Accent / Quote	Cormorant Garamond	Italic	15–30px	1.4–1.5

RULES

- 01 Never mix the two typefaces within a single sentence. Emphasis inside body copy is italic Cormorant Garamond, not bold Montserrat.
- 02 Body copy is never bold.
- 03 Labels/captions are always uppercase Montserrat SemiBold with wide letter-spacing — never the serif typeface, never sentence case.
- 04 Limit to one large serif display moment per screen/section — avoid stacking multiple oversized headlines in the same view.

Ready-to-use CSS custom properties matching the tokens above.

```
:root {
  --color-ivory:      #F3F0EA;
  --color-sand:       #D2C4B2;
  --color-taupe:      #B8AA9D;
  --color-charcoal:   #3E312B;
  --color-olive:      #6B6857;
  --color-cinnamon:   #9B6A4E; /* large text / decorative only */
  --color-cinnamon-tint: #C49F8A; /* text on dark backgrounds */
  --color-cinnamon-deep: #906348; /* small text on light backgrounds */
  --color-sandstone:  #8D806F; /* rare accent, large text only */

  --font-display: 'Cormorant Garamond', serif;
  --font-body:    'Montserrat', sans-serif;
}
```

Fonts: Cormorant Garamond and Montserrat are both available on Google Fonts as variable font files, or can be self-hosted.
